SANIPON

SANITIZING DETERGENT

CHARACTERISTICS

- ✓ **Sanitizing detergent** ideal for daily cleaning of floors in marble, stone, terrazzo, ceramic, terracotta, wood, pvc, etc...
- ✓ Thanks to its particular formulation it can be used on any type of floor, **even if previously treated.**
- ✓ It is very effective against **germs and bacteria**, and if regularly applied it is suitable to prevent from the formation of unpleasant odours linked to the decay of organic substances.
- ✓ Properly diluted according to the label there's **no need to rinse.**

HOW TO USE

- ✓ For daily cleaning dilute 50gr. of product in 5 lt. of water. Clean the surface using a mop or a cotton cloth and let it dry. **NO need to rinse.**
- ✓ On very dirty surfaces we suggest to dilute until 200gr. of product in 5lt. of water, then rinse the eventual excess with clean water.

Contains: benzalkonium chloride

Made in **BERGAMO**
